

# Transducer for DC systems up to 1000 V (CAT III)

Your strong partner in Transducers

- Current input optionally between  $\pm 5$  A
- Voltage input up to  $\pm 1500$  V
- 2 Standard signal outputs
- 1 Relay Output
- Flexible application thanks to DIP-Switch
- Wide Range Power Supply 21-265 V AC/DC
- Response time 250 ms
- Modbus - Interface

## We measure everywhere

Limit controllers, transducers, shunts, position indicators, current transformers, analogue & digital panel meters, etc.
