

REACH- supplier declaration

According to the EU regulation 1907/2006 (REACH-VO) from the 18th December 2006 we act like a downstream user.

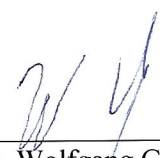

As a downstream user we are not subjected to the duty of register.

Belong to the supplier declarations of our vendors, there are no substances used which are on the current list of candidates (SVHC- list) for our materials with a higher concentration than 0.1 mass percentage.

Within the supply chain the vendor of goods is obliged, according to the 33rd article of the REACH- enforcement, to announce his commercial customers without having been asked if a SVHC substance with a higher concentration than 0.1 mass percentage is included in the good.

As soon as we detect one of our products being under the duty of register according to the 33rd article, we are going to inform you immediately and without having been asked.
